No. 8. Faust, Ernest Carroll, and Oo-keh Khaw. Studies  
on Clonorchis Sinensis (Cobbold.) Assisted by Yao  
He-Fang and Chao Yung-An. With a consideration  
of the molluscan hosts of Clonorchis Sinensis (Cobbold)  
in Japan, China, and Southeastern Asia, and other spe-  
cies of molluscs closely related to them by Bryant Walker.  
Her. 1927.

# The American Journal of Hygiene

Editor: William H. Welch

Managing Editor: Charles E. Simon

The American Journal of Hygiene is devoted primarily to the publication of the results of original investigations in the domain of hygiene, using the term in its broadest sense, to cover all applications of the medical, biological, chemical, physical and mathematical sciences to problems of personal and public health. It is supported by the DeLamar Fund of the Johns Hopkins University, and is thus enabled to bring out, in addition to its regular issues, papers of unusual length, in the form of separate monographs.

The regular issues of the Journal, for the present, appear bi-monthly, six numbers constituting a volume.

The subscription price to the regular issues is \$6.00 per annum, domestic, \$6.25 for Canada and \$6.50 foreign.

The monographs are sold separately, the price of the individual copy varying with the cost of production.

*Contributors to the regular issues are furnished 100 reprints free of charge.*

Back volumes of the regular issues of the Journal may be had for \$25.00 a set (volumes 1-6 inclusive), or separately at the following rates:

Volume I. . . . .	\$3.00
Volumes II to VI. . . . .	\$5.00 each.

The Monographs which the Journal has issued to date and the corresponding prices are the following:

- No. 1. Influenza. An epidemiologic study. By Warren T. Vaughan. July, 1921. \$2.00.
- No. 2. Suicide and its relation to climate and other factors. By John Rice Miner. July, 1922. \$1.50.
- No. 3. Studies on Schistosomiasis japonica. By Ernest Carroll Faust and Henry Edmund Meleney. March, 1924. \$3.00.
- No. 4. The life cycle of the human intestinal fluke *Fasciolopsis buski* (Lankester). By Claude Hemon Barlow. July, 1925. \$2.00.
- No. 5. Studies of the epidemiology of malaria in the coastal lowlands of Brazil, made before and after the execution of control measures. By Mark F. Boyd and collaborators. May, 1926. \$3.00.
- No. 6. The School of Hygiene and Public Health of the Johns Hopkins University, September, 1926. Free on request.
- No. 7. Researches on hookworm in China. By W. W. Cort, J. B. Grant, N. R. Stoll and other collaborators. (\$4.50.)  
Price of set (1-7 incl.) . . . . . \$12.00.
- No. 8. Studies on Chlonorchiasis. By E. C. Faust and O. K. Khaw. (In Press.)

Papers submitted for publication, as well as all communications should be directed to the Managing Editor, Dr. Charles E. Simon, School of Hygiene and Public Health, 615 N. Wolfe Street, Baltimore, Md.

Checks and Money orders should be made payable to the American Journal of Hygiene.
